G-Suite	Google	Collaboration & productivity apps	Forms, database, documents, spreadsheets	Operations	As needed	As needed

What is excluded?

Enterprise systems do not include cybersecurity systems, infrastructure and mechanical control systems, or information that would reveal vulnerabilities to, or otherwise increase the potential for an attack on a public agency's IT system.

Additionally, section 6270.5 does not automatically require disclosure of the specific records that the IT systems collect, store, exchange or analyze; however, the Act's other provisions pertaining to disclosure of such records still apply.
